VALÈNCIA

28/05/2018

Young students had a close encounter with MEDSEALITTER researchers

Expociència is the open day of the Parc Científic de la Universitat de València - UV.

The aim of #Expociència is to spread science among citizens and to report the daily work of scientists and entrepreneurs. Furthermore, the open day is a good occasion to introduce research projects UV is involved in, as MEDSEALITTER. Today, citizens and young students had the opportunity of a close encounter with MEDSEALITTER researchers and technicians.
